Risk	Description	Mitigation	Contingency	Likelihood	Impact	Score
Internet (wi-fi) down	The wifi connection in my flat could potentially go down. This means I would not be able to access resources on it.	Use neighbour's wifi or go over to my parents' house and use theirs.	Make sure there are back up options to gain access to the internet.	low	medium	4
Theft	If my flat is broken into and my possesions are stolen, it would stop me from being able to work on the project unless I could use someone else's devices.	Ensure the flat is locked whenever I am out and ask family if I could use/borrow their devices.	Make sure there are no easy opportunites for my flat to be broken into and have back up options.	low	high	7
Running out of time	The project could take longer than I am expecting and I am unable to finish everything on time.	Stick with what is on the Jira board in order to reach the MVP target. Ask for help, if it is necessary, from the trainer.	Maintain good project and time management.	low	high	7
Laptop dies	The battery or something else on my laptop could cause it to stop working.	Use my older laptop and get everything set up on there to use instead.	Make sure to push regularly to GitHub when working on the project and have my older laptop ready to go.	low	medium	4
Illness	I could become ill and find it more difficult to complete the project.	Follow good hygiene, do not come into close contact with sick people.	Make sure I don't become so sick that I cannot work on my project.	low	meduim	4
Deliveries	Someone could deliver something to my flat which will take me away from working on my project.	Be as quick as possible when anwering the door. Don't let it distract you too much from the project.	Keep focused on the project.	high	low	3
